

Sicurezza roller latch, round and square ends - 22x238 mm forend

Description

Embedded lock with spring roller latch and bolt, to be used in combination with a DIN V 18254 profile cylinder. Holes for mounting handles with through screws, Tenax and C-liner.

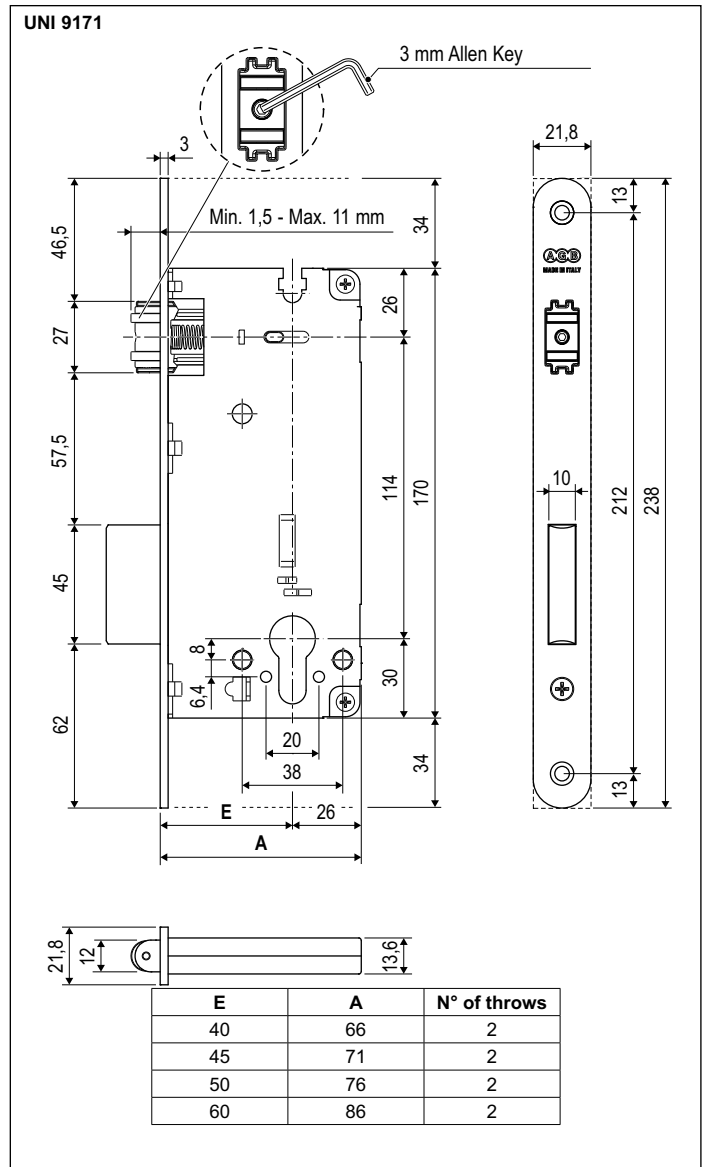

Application

For internal and main doors, it has to be coupled with strikers dedicated to Sicurezza roller latch.

Mounting

Fix the lock with two screws (4x25 mm).

Note: the striker and the cylinder must be ordered separately.
